decarbonising HVAC solutions

— Working together to achieve

sustainable climate control

Striving towards your NetZero ambitions through sustainable HVAC and building decarbonisation solutions.

Innovative HVAC for decarbonising and achieving NetZero

As dedicated partners, we offer a comprehensive range of customised HVAC solutions tailored to the unique requirements of commercial, industrial, and residential buildings. Our systems are expertly engineered to maximise energy efficiency and minimise carbon emissions. By utilising advanced climate control technologies, we ensure optimal comfort while significantly reducing energy costs. Our solutions are specifically designed to align with your operational needs and sustainability objectives, making it easier to achieve your Net Zero goals.

By advising and implementing cutting-edge technologies and optimising system performance, we help our clients reduce energy consumption, lower carbon emissions, and achieve sustainability goals.

Renewable Integration

Carbon neutral HVAC solutions that incorporate renewable energy sources to reduce reliance on fossil fuels, contributing to overall building sustainability.

Sustainability Audits

Offer basic energy audits and sustainability assessments to help businesses understand their current carbon footprint and identify opportunities for improvement.

EPC Advice

We offer customised solutions and guidance to help commercial buildings achieve desired EPC ratings for landlords, tenants, and building owners. Leveraging our HVAC expertise and sustainable practices, we deliver decarbonisation solutions and energy efficiency improvements. This empowers clients to reduce their environmental footprint, save money on utility bills, and make their buildings more attractive for renting or leasing.

Every application covered

Commercial

Warehouses
Distribution Centres
Logistic Centres
Retail
Storage Facilities

Industrial

Workshops
Industrial Units
Manufacturing Facilities
Logistic Centres
Factories

Residential

High Rise
Offices
Accommodation Blocks
Hotels

Electric

A range of electric solutions for small to large buildings combining ASHP and air movement technologies to control temperatures using minimal energy.

Water

Low temperature hot water systems compatible with ASHP and chiller technologies which effectively provide spot conditioning and temperature critical climate control.

Hydrogen

Hydrogen ready solutions capable of burning either natural gas or pure (100%) hydrogen ensuring that buildings are prepared for a significant transition.

Air Quality

Natural ventilation systems which assist in sustainable climate control providing improved indoor air quality to help towards achieving BREEAM and Passivhaus requirements.

Over 75 years knowledge of air movement

With over 75 years of expertise in air movement, Powrmatic excels in providing sustainable heating and cooling solutions tailored to meet diverse customer needs.

Our extensive knowledge ensures that we can expertly control and condition spaces, whether for people, processes, storage, or distribution. Leveraging our experience, we offer a range of temperature control options that incorporate the latest sustainable technologies, ensuring optimal performance and comfort while adhering to green credentials.

By combining our deep industry knowledge with innovative approaches, Powrmatic remains a trusted partner in achieving energy-efficient and environmentally friendly climate solutions.

Working together to decarbonise your building through efficient HVAC technologies.

Reach out to Powrmatic to arrange a digital or in-person consultation, or a site visit, for expert assistance with selecting and applying our solutions to meet your project requirements. Our tailored solutions will help you cut carbon emissions and work towards your net zero goals. Let us support your sustainable climate control initiatives.
